Orion Community Unit School District #223 COVID-19 Flow Chart

Updated 07/28/20

Definitions

Asymptomatic—Showing no symptoms

Symptomatic—Showing symptoms

Close contact—Within 6 feet for at least 15 minutes.

My student's temperature is 100.4 at the bus or when dropped off at school.

↓

Student is not allowed to get on the bus or enter school.

↓

For younger students who ride a bus, a parent/guardian must be immediately available until a student is allowed on the bus (either at the stop or at home). If a student has a temperature at school, the student is taken to an isolated room where they will be cared for by trained staff until a parent can pick them up.

Symptoms:

Fever, cough, shortness of breath, chills, fatigue, muscle and body aches, sore throat, new loss of taste or smell, congestion or runny nose, nausea, vomiting, or diarrhea.

My student develops a fever of 100.4 while at school.

↓

Student will be isolated in a designated room (as with any sickness) and evaluated by the school nurse. Parents contacted.

Student also has **at least** ONE other COVID-19 symptom.

↓

Student will be allowed to return 10 days after symptoms first appear or 24 hours after symptoms resolve, whichever is longer.

Or

They will be allowed to return after 2 negative COVID-19 tests in a row, with testing done at least 24 hours apart.

Student **does not** have any other COVID-19 symptoms.

↓

Student will be allowed to return after they are **fever free for 24 hours and no additional symptoms develop** during that time.

A student in my child's classroom tests positive for COVID-19.

Your child was in close contact with positive student.

↓

Your child is quarantined and allowed to return to school **14 days after most recent exposure** unless symptoms develop during the quarantine period.

Your child **was not** in close contact with positive student.

↓

Child can resume school as normal as long as they are showing no symptoms.

A member in your household tests <u>positive</u> for COVID-19.

↓

All students in your household will not be allowed at school until 14 days after the case's isolation ends.

If another member of the household develops symptoms, the student(s) will continue quarantine until 14 days after the new case's isolation ends.

A member in your household shows symptoms of COVID-19.

Close contact with known positive COVID-19 case.

↓

See recommendation: **If a member in your household tests positive.**

No close contact with known positive COVID-19 case.

↓

Child can attend school as normal as long as the are showing no symptoms.

My child has no fever, but is showing one or more symptoms of COVID-19.

Child is showing only **one** symptom.

↓

If any concern that a child may have been exposed to COVID-19, then child should stay home until symptom free for 24 hours and no other symptoms develop.

Child is showing **more than one** symptom.

↓

Child may return a minimum of **10 days after symptoms first appear** and 24 hours symptom free or after 2 negative COVID-19 tests in a row, with tests done at least 24 hours apart.
